1) The software contains the open-source software programs listed in Annex 1. Unless otherwise agreed, the open-source software programs listed in Annex 1 are not subject to the provisions of the Software License Agreement, but instead to the provisions of the licensing conditions that apply to each of the open-source software programs in question. These can be found in Annexes 2 to 11 on the accompanying DVD; see the License-Agreements folder.

2) The open-source software programs listed in Annex 1 are provided free of charge.

3) If the open-source software programs listed in Annex 1 are subject to GPL or LGPL licenses, the following shall apply:

A complete, machine-readable copy of the source code for the open-source software programs can be found on the accompanying DVD; see the Open-Source-Code folder.

4) If the open-source software programs listed in Annex 1 are subject to a GPL 2 license, the following shall apply:

b) Interpretation

If the disclaimer of warranty and limitation of liability provided above cannot be given local legal effect according to their terms, reviewing courts shall apply local law that most closely approximates an absolute waiver of all civil liability in connection with the Program, unless a warranty or assumption of liability accompanies a copy of the Program in return for a fee.

11) If the open-source software programs listed in Annex 1 are subject to a FreeRTOS license, the following shall apply:

a) Original version:

Any FreeRTOS source code, whether modified or in its original release form, or whether in whole or in part, can only be distributed by you under the terms of the GNU General Public License plus this exception. An independent module is a module which is not derived from or based on FreeRTOS.

EXCEPTION TEXT:

Clause 1

Linking FreeRTOS statically or dynamically with other modules is making a combined work based on FreeRTOS. Thus, the terms and conditions of the GNU General Public License cover the whole combination.

As a special exception, the copyright holder of FreeRTOS gives you permission to link FreeRTOS with independent modules that communicate with FreeRTOS solely through the FreeRTOS API interface, regardless of the license terms of these independent modules, and to copy and distribute the resulting combined work under terms of your choice, provided that

Every copy of the combined work is accompanied by a written statement that details to the recipient the version of FreeRTOS used and an offer by yourself to provide the FreeRTOS source code (including any modifications you may have made) should the recipient request it.

The combined work is not itself an RTOS, scheduler, kernel or related product.

The independent modules add significant and primary functionality that is unrelated to multitasking, intertask communication or intertask signaling - and therefore do not merely extend the functionality already present in FreeRTOS.

Clause 2

FreeRTOS may not be used for any competitive or comparative purpose, including the publication

Open Source Software License Agreement

of any form of run time or compile time metric, without the express permission of Real Time Engineers Ltd. (this is the norm within the industry and is intended to ensure information accuracy).

12) If the open-source software programs listed in Annex 1 are subject to a DAVE license, the following shall apply:

Redistributions in binary form must reproduce the above copyright notice, this list of conditions and the following disclaimer in the documentation and/or other materials provided with the distribution. Neither the name of the copyright holders nor the names of its contributors may be used to endorse or promote products derived from this software without specific prior written permission.

To improve the quality of the software, users are encouraged to share modifications, enhancements or bug fixes with Infineon Technologies AG (dave@infineon.com).
