

October 2016

FOERSTER exhibits at the WIRE & CABLE in India

Wire testing systems attract great interest

For the sixth time, the three trade fairs WIRE & CABLE INDIA, Tube India, and Metallurgy India were held simultaneously at the Bombay Convention & Exhibition Center in Mumbai, India. The FOERSTER company and their local Indian representation EECl were also there with a trade fair stand, where they presented their products from October 5 to 7, 2016.

During the three days, a total of over 400 exhibitors showed the latest trends and technologies from the areas of wire and cable manufacturing as well as tube and metal processing. In addition to Indian exhibitors, many German, Austrian, Italian, as well as Chinese and American companies were also represented. 12,300 visitors were registered over the exhibition days.

The FOERSTER and EECl stand was also very popular among the visitors. With the CIRCOGRAPH CI and the DEFECTOMAT CI, FOERSTER showed two compact yet versatile testing devices that are optimally suited for reliable wire testing. Due to the technical expertise of the visitors, many qualified discussions were held at the stand. The visitors were interested above all in machines for wire manufacturing and further processing, for example, for cable production, among other things.

The trade fair allowed FOERSTER to expand existing customer relationships, make new, valuable contacts, and acquire further insights into the Indian market. After this successful trade fair, the FOERSTER company is already looking forward to the next WIRE & CABLE India from November 27 to 29, 2018.
