

TCM DOCKING STATION

From mobile inspection device to full workstation setup

Turn your TCM into a fully integrated workstation for reporting, evaluation and documentation. With the docking station, the TCM can be seamlessly integrated into a stationary workstation environment. Thanks to its powerful Intel-based hardware platform and Windows operating system, the TCM can be used not only as a mobile inspection device but also as a desktop-style workstation for evaluation and documentation tasks.

External peripherals such as monitor, keyboard, mouse and network connection can be connected directly via the docking station. This enables convenient report generation, data evaluation and documentation directly on the TCM – without requiring an additional computer.

YOUR ADVANTAGES AT A GLANCE

Easy workstation integration: Easy integration of the TCM into a workstation environment

Comfortable operation: Comfortable operation with external monitor, keyboard and mouse

Direct report generation: Direct report generation and documentation on the TCM

Fast network connection: Fast connection to network infrastructure and peripherals

Mobile & stationary use: Enables stationary workstation use in addition to mobile inspection tasks

Efficient documentation & evaluation: Ideal for efficient documentation and evaluation workflows

TECHNICAL INFORMATION

MANUFACTURER:	DURABOOK
PRODUCT:	Office Dock with AC adapter
INTERFACES:	— DC-in jack — Ethernet (RJ-45, 10/100/1000) — 2 × USB 3.0 (Type A) — 2 × USB 2.0 (Type A) — HDMI (Type A) — VGA — Serial COM port (D-sub) — Audio out jack — Microphone in jack
DIMENSIONS:	242 mm × 122 mm × 158 mm (W × D × H)
WEIGHT:	1.31 kg
