

TCM SHOULDER STRAP

For comfortable hands-free operation of the TCM during mobile inspection tasks

Hands-free inspection. Improved comfort. The 4-point shoulder strap significantly improves handling comfort during longer mobile inspection tasks with the TCM. It allows the device to be carried securely in a horizontal working position while keeping both hands free for inspection.

This ensures stable positioning of the instrument and supports ergonomic operation in demanding field environments.

YOUR ADVANTAGES AT A GLANCE

Hands-free operation: Hands-free operation during mobile inspection tasks

Comfortable handling: Comfortable handling during extended use

Secure positioning: Secure horizontal positioning of the device

Improved ergonomics: Improved ergonomics in field applications

Mobile inspection operations: Ideal for longer inspection workflows on site

TECHNICAL INFORMATION

MANUFACTURER:	DURABOOK
PRODUCT:	4-Point Shoulder Strap
SCOPE OF DELIVERY:	— 4-point shoulder strap — 2 × D-rings — 2 × mounting screws (side attachment) — Shoulder strap holder (bottom attachment) — 2 × mounting screws (holder)
INSTALLATION:	The shoulder strap is securely attached to the device using side-mounted D-rings and a bottom holder, allowing stable horizontal positioning of the TCM for comfortable hands-free operation during mobile inspection tasks.
