

TCM SPARE BATTERY

Extend the operating time of your TCM and stay productive even during long inspection workflows.

Extended runtime for longer inspection tasks. The extended high-capacity spare battery significantly increases the operating time of the TCM and ensures maximum availability during mobile inspection tasks. A charged spare battery can be quickly swapped at any time, allowing longer inspections to continue without interruption.

Batteries can be charged either directly inside the TCM or externally using a dedicated charging station. A quick-charge function supports short charging times and ensures spare batteries are ready for use again quickly.

This makes the spare battery ideal for extended field inspections and applications with increased power requirements.

YOUR ADVANTAGES AT A GLANCE

Extended operating time: Extended operating time during mobile inspection tasks

Quick battery replacement: Quick battery replacement for uninterrupted workflows

Flexible charging: Charging possible inside the device or externally

Quick-charge support: Quick-charge support for reduced downtime

Ideal for extended field use

TECHNICAL INFORMATION

MANUFACTURER:	DURABOOK
PRODUCT:	Extended high-capacity lithium-ion battery
COMPATIBILITY:	TCM
